

## **Skill test and proficiency checks – implementation of PBN**

### **Information for non-Polish examiners**

The new PBN regulations require to have PBN privileges within their IR or EIR after 25.08.2020. From 25.08.2018 pilots may fly in accordance with PBN routes and procedures as they have the endorsements to their Instrument rating.

To enable conducting skill tests and proficiency checks for the PBN endorsement, the native CAA should authorize the examiner. Examiners have the additional information in their examiners' certificates, e.g.: *IRE / PBN according to Reg. EU 2016/539*.

A non-polish examiner shall also be specially authorized to conduct a skill test / proficiency check for Polish license's holder within PBN operations. To be compliant with Reg. EU 2016/539 it is mandatory for ATO to provide the appropriate PBN training and /or evidence of the required competence. After receiving the certificate confirming the PBN operations, the non-Polish examiner (with the special authorization) can conduct the proficiency check, after which he can endorse it to the temporary PBN confirmation. Temporary PBN confirmations will be in use till 25.08.2020.
